

## INTERNSHIPS PROGRAM

Every year, Eton School Mexico organizes internships for our 12<sup>th</sup> graders, where they spend a week working with professionals in fields that align with their career and university interests to get some real-world work experience. This allows them to define practical skills, aptitudes, and competencies that complement their career selection process.

For this program to work, we need companies and institutions to take our students; therefore, we ask for the invaluable help of people whose workplaces can and want to provide them with these unique opportunities.

This year, the 12<sup>th</sup>-grade class is interested in these fields:

- Architecture
- Visual arts
- Molecular biology
- Food science
- Sports science and administration
- Fashion and image communications
- Dance
- Law
- Business administration
- Interior design
- Finance
- Aerospace engineering
- Business engineering
- Food systems engineering
- Industrial engineering
- Mechanical engineering
- Chemical engineering
- Mechatronics
- Medicine
- Marketing
- Business
- Neuroscience
- Nutrition
- Event planning
- Education
- Musical production
- Psychology
- Publicity
- Veterinary

Internships are January 26 to 30, and we'll only be sending students interested in each company's activities. Likewise, companies set the schedules so that this doesn't interfere in their daily activities.

It would be an honor for us to have your support and collaboration in this project, with which we hope to share successful experiences that promote the development of our young people's competencies.

Warm regards,

Martha Ruiz Carrillo  
High School College Counselor
